- Basic research is systematic activity, which priority aim is broadening of knowledges or novel knowledges about the investigated subject and their deeper understanding, regardless of potential practical applications in the future.
- Applied research is systematic activity oriented towards practical application of knowledge and/or discovering novel scientific knowledges with the aim of their utilization in economic or social areas.
- Základný výskum je systematická činnosť, ktorej prioritným cieľom je rozšírenie poznatkov o skúmanom objekte a ich hlbšie pochopenie bez ohľadu na praktické aplikácie získaných poznatkov.
- Aplikovaný výskum je systematická činnosť orientovaná na praktické využitie poznatkov a objavovanie nových vedeckých poznatkov s cieľom využiť ich v hospodárskej a spoločenskej oblasti.
